Short Bungee ball		18
Screw		54
Hook		10
Roof		1
Side Panels		8
Door Panels		2

INSTRUCTION OF 4X8M PAVILION

Before putting up

When unpacking the parts, keep away from children. Smaller parts could be swallowed and suffocation can be caused by plastic bags! Choose a suitable location for your pavilion.

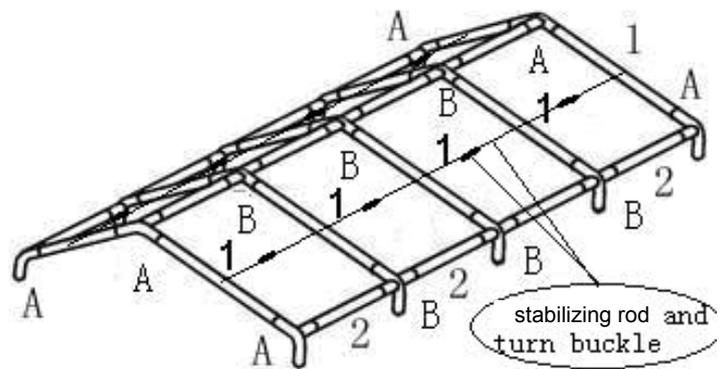

Pay attention to the following points when choosing a location:

- the pavilion must stand on a flat, non-slip and safe place
- choose a sheltered location
- avoid damage to the material, please place the pavilion so that it cannot rub or chafe on branches, parts of buildings etc.
- put up the pavilion at a safe distance to fireplaces and pay attention to the direction of the wind
- leave your pavilion to dry in an erected position before packing it away.

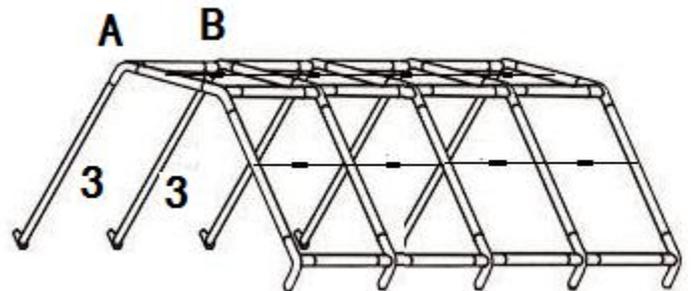

1. Select a flat ground for the pavilion, unpack the carton and check all the parts including tubes, tent and accessories... etc. are present as same as list.

Assemble the framework of rooftop by joining the portion (A,B) together with poles (1,2). To ensure the screw fixed to every pole tightly.

And then fix the steel ropes and turn buckles to strengthen the roof.

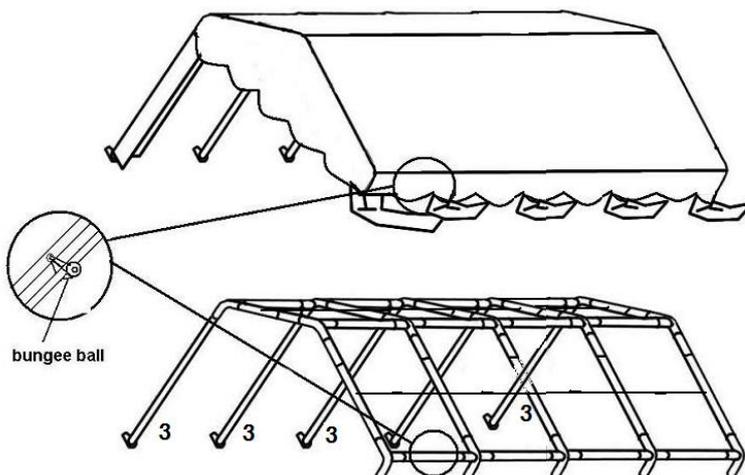

2. Attach one side of supported poles (3) to the joints (A,B)

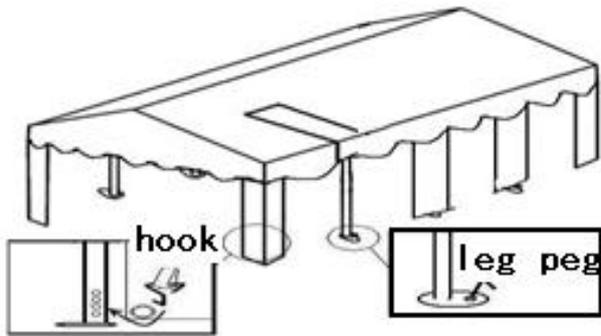

3.

Cover the roof on the frame, and attach it by the long bungee balls properly, take care of the tension of the bungee balls, for if you use too many on one side of tent, it may too tight to tie the other side of it.

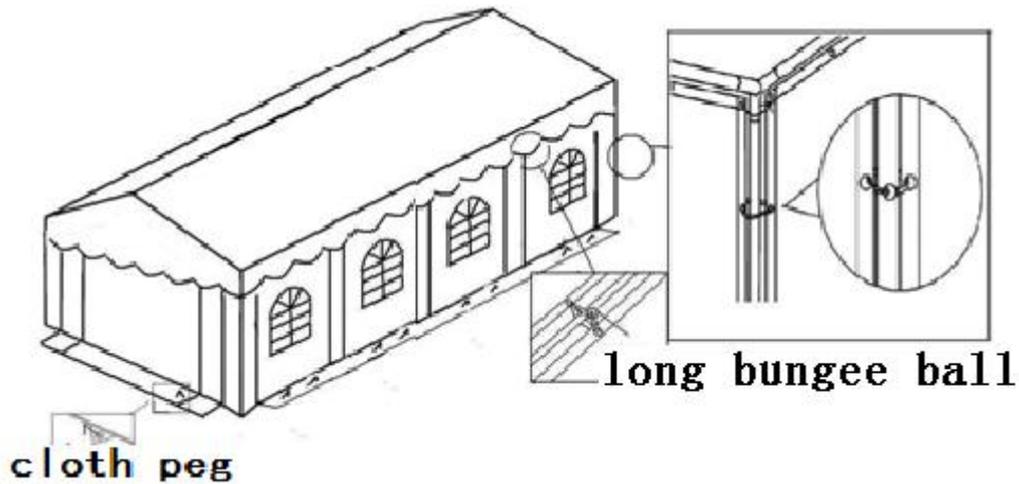

INSTRUCTION OF 4X8M PAVILION

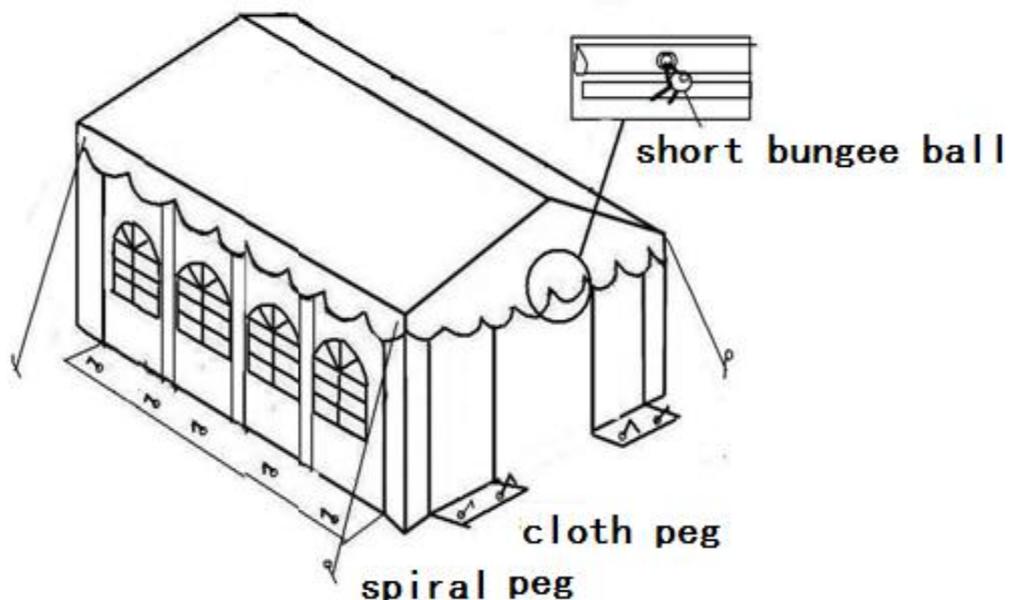

4. Attach the another side of supported poles (3) to the joints (A,B), built-up the framework, use the long leg peg to fix each pole into the ground and use the hook to fix the leg cover to the leg.

5. Spread the wall panel and door panel attach to framework by using the bungee balls clasping the frame to grommets that is construct over the wall panel and door panel to ensure stability. Also use the short cloth pegs to fix the doors and side walls to the ground.

6. The Guy lines clasp to each corner of tent and another end of line fix to ground by pegs

INSTRUCTION OF 4X8M PAVILION

Warning

1. Take note that the pavilion needs to be handled carefully to avoid damage.
2. Do not force the frame as they may be damaged in the process.
3. The pavilion is not suitable in some weather conditions eg. severe wind, snowfall, hailstones etc. It is recommended you temporarily take down the pavilion. The pavilion is not suitable for use all year round, and should NEVER be left to stand unattended for a long time.
4. In sudden downpours you should ensure that no puddles can form on the pavilion
5. Please select a suitable site for the tent to avoid the damage to underground sprinkler systems, water, gas or electrical lines.
6. Do not use any gas or petroleum lamps in the pavilion. The fumes could be fatal. Do not use any open flame of any kind in the pavilion. Avoid cooking in the pavilion.
7. When setting up heaters please make sure they are at least 0.5 m away from inflammable materials
8. Consult local and national norms for the following norms and regulations
 - maintenance of industrial health and safety standards
 - fire protection regulations
 - building regulations

Storage

Store the pavilion in a dry place protected from the light and ensure that it was dry and clean when packed. This is to prevent mildew and smells. Avoid compressing the pavilion.

Cleaning the pavilion

Carefully wipe any stains with lukewarm water or mild soapy water.

Do not use any chemical cleansers. Never wash it in the washing machine.

Follow the instructions for use and care, so that you can enjoy your gazebo for a long time. Keep these instructions for further reference.
